Abdelrhman Samy

Front End Developer

Email: abdelrhman.codecraft@gmail.com

Address: Cairo, Egypt

Phone: (+20) 1550283393

Website: My Works

Summary

Passionate and detail-oriented junior Front End Developer with hands-on experience in building responsive and interactive web applications using React, Redux, and modern web technologies. Eager to contribute to a dynamic team while continuing to learn and grow in a professional environment.

Experience

Front End Developer @ Upskilling Academy (Full-Time)
Training

Jan 2025 - May 2025

- Worked on real-world projects using **React** and **TypeScript**.
- Gained hands-on experience in **team collaboration** with **Git** and **Agile methodologies**.
- Contributed to building a **Project Management System** with **Authentication** and **Task Management features**

Freelance Front-End Developer - Aplus Platforms (Part-Time)

September 2025 - May 2025

- Collaborated with a backend developer to deliver new features.
- Improved the **UI design** to enhance user experience and consistency.
- Integrated the frontend with backend APIs to ensure seamless functionality

Projects

Hotel Booking App (Team Project – Training)

I developed a complete hotel booking system that enables users to search for hotels, select dates, and complete secure payments. As part of a collaborative team, I worked on designing and implementing responsive, user-friendly interfaces using **Material UI**. To manage the global state efficiently, I utilized **Redux Toolkit** for handling user sessions, booking data, and hotel listings. Additionally, I integrated APIs to manage hotel information, bookings, and payment processing, ensuring a smooth and dynamic user experience.

PMS – Project Management System (Team Project – Training)

I built a project using **React, TypeScript, and React Bootstrap** with a fully responsive design.Working collaboratively with my team, I implemented core features including **user authentication with role-based access, profile editing, task management with due dates, and team & project dashboards**. For state management and API integration, I utilized **Axios and the Context API**, ensuring smooth data flow and reliable communication with the backend.

- Live Demo: **[Project Management System](#)**
- Githup Repo: **https://lnkd.in/d4GfueJM**

Food Management System (Solo Project – Training)

I developed a **sidebar-based dashboard** that included pages to manage users, categories,and recipes. The system supported full **CRUD operations** with real-time API integration,allowing seamless data management. I also implemented complete **user authentication flows** including registration, login, and forgot/reset/change password functionality. For global state handling and API communication, I applied the **Context API**, ensuring consistent and reliable data flow across the application.

Education

Higher Institute for Agricultural Cooperation in Shubra El-Kheima
Benha University

Skills

- Html, Css
- JavaScript
- TypeScript
- Tailwind, (MUI)

- React.js
- Next.js
- Redux Toolkit
- Responsive Design

- git, githup
- REST API Integration
- Agile/scrum

Languages

- **Arabic:** Native

- **English:** Intermediate Level
